

Water Quality Association offers a full range of NSF/ANSI Certifications

WQA certification ensures that your product meets or exceeds industry standards

Manufacturers and suppliers of any product that contacts drinking water including chemicals, components, filters, coatings, faucets, water softeners, reverse osmosis systems and swimming pool circulation systems can be certified by the Water Quality Association's (WQA) Gold Seal Product Certification Program. WQA offers lower certification fees with its cost effective pricing.

NSF/ANSI Standards: 60, 61 | 14 | 50 | 42, 44, 53, 55, 58, 62 | 177 | 222

Manufacturers can be assured that products certified by the Water Quality Association comply with the requirements of industry standards (WQA, NSF/ANSI, IAPMO, ASME, ASTM). Products that display the Water Quality Association's Gold Seal provide assurance to consumers and regulatory agencies that these certified products have been rigorously tested and meet the requirements of the NSF/ANSI standards for which WQA maintains certification.

Benefits of Water Quality Association's Gold Seal Product Certification

- ◆ One-on-one communications with an expert
